

GOLF BALL ART

You will need:

- Golf balls
- Gray paint in two shades
- Blue paint in two shades
- Fine point permanent marker
- Googly eyes
- Craft foam in blue and gray
- Glue

Directions:

1. Take your permanent marker and draw the mouth, teeth and outline around the mouth.
2. Paint the darker color on the ball, outside of the outline. This will take at least two coats.
3. Once dry, cut out fins and tail. The dorsal fins are triangles, as are the two smaller side fins. The tail is also a basic shape.
4. Glue them in place. You can use hot glue or other glue.
5. Glue on the eyes.
6. Take the lighter colors and paint a pointed area between the eyes and follow it along to the tail.
7. Cut small strips from scraps. Glue them on the edge of the eyes, making them look angry
